

## Getting the dashboard

Two bulbs shine back onto the dashboard.  
to get to them take the speaker cover off top of dash board

Two small Hex screws.

lift lip up and towards screen pillar

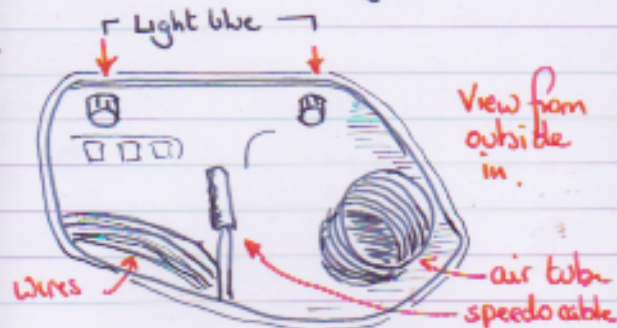

The speaker lid has a metal clip on the medial border so you cannot just lift an slide towards you

looking through the windscreen you can now see the back of the dashboard + all the lights  
The top two light blue ones are

## Lights working

25-26-1-14

what we need to change

The lamps are bayonet fitted, but both really stiff.

When replacing use rubber + nylon lubricant on the plastic\* & they will slip back really easily.

Replace cover ensuring air tube in right position. I also re-clipped the speedo cable back on  
\*use cotton bud.
