To: Reading Saab <readingsaab@outlook.com>;

To whom it may concern,

I can confirm as Saab 9-3ss model registrar for the Saab Owners Club GB that to the best of my knowledge Saab 9-3s from 2002-2012 (YS3F) fitted with 1998cc petrol engines (known as b207) are compliant with the Euro4 emissions criteria despite production beginning before this standard was compulsory for new vehicles.

Saab ceased production of all new vehicles in 2012 with the subsequent owners, NEVS, ceasing production in 2014. As a manufacturer, Saab no longer exists to provide evidence as is required by some organisations. I recommend the use of the vehicle registration document.

Mr. Robin Whitby

Saab 9-3ss SOC Registrar
